CEDAR EDEN ENVIRONMENTAL CELEBRATES FIRST YEAR IN BUSINESS

Saranac Lake, NY • Cedar Eden Environmental is celebrating its first year in business as a New York limited liability company. Though small and located in the rural northern Adirondacks outside of Saranac Lake, Cedar Eden Environmental has clients and projects locally, regionally and across the nation. With projects in New York, Pennsylvania, Indiana, and California, Cedar Eden's list of clients include the New York Department of Environmental Conservation, the New York Department of Agriculture and Markets, local lake associations and municipalities, county conservation districts scattered throughout New York and Pennsylvania, and the Los Angeles Department of Water and Power.

Cedar Eden owes its success to its principle, Michael R. Martin, who has been active in environmental protection for over seventeen years, including ten years in the Adirondacks. In keeping with Adirondack tradition, Martin is a local resident with international peers. He is a Certified Lake Manager, a director of the North American Lake Management Society, a former director of the New York State Federation of Lake Associations, and long-time member of the American Fisheries Society and the American Society of Limnology and Oceanography. Martin was the founding executive director of the Adirondack Aquatic Institute for eight years and is a founding member of the Indiana Lake

Management Society. During the past seventeen years, he has collected, analyzed, and interpreted data and developed long-term lake and watershed management programs on hundreds of lakes and ponds throughout New York, New Hampshire, Pennsylvania, New Jersey, Delaware, West Virginia, Virginia, and Indiana. He has written well over 50 publications and reports on lake and watershed management, lake restoration, and the effects of acid precipitation. "I enjoy bringing world-class expertise and technology to work here in the Adirondacks to help preserve what I see as one of this planet's true environmental treasures," Martin said. "And I appreciate where I am able to live, the opportunity for travel, and the small contribution I am able to make towards helping folks preserve the environment which has been made possible by my work here," Martin added.

Cedar Eden Environmental, LLC specializes in the design, implementation and management of GIS projects for Environmental Resource and Natural Features Inventories, Municipal Wastewater and Comprehensive Management Plans, Agricultural Environmental Management, Watershed Management, Regional Water Quality Assessment, and Land Use Mapping. The company also excels in lake and watershed management (water quality monitoring, aquatic plant mapping & management, restoration & management plans, permitting) and environmental design (education materials, web sites, graphics).
